

# EveryAware Case Studies

## Terms of Use / Privacy Statement

EveryAware Case Studies are provided and jointly developed by the ISI Foundation, Sapienza University, CSP, L3S Research Center Hannover, University College London, and VITO in the context of the EveryAware research project. Concerning the collection of usage data, EveryAware Case Studies are subject to the regulations of the Hessisches Datenschutzgesetz of which § 33 HDSG has central importance.

For research purposes, EveryAware Case Studies collecting more user data than common commercial web applications. The data is being used for localization, detecting noise, recommendations and notification functions. Since research is usually an open process, it is not possible to enumerate all potential applications of the data. However, the providers of EveryAware Case Studies are interested in research and not in identifying individual persons given the data. Furthermore, under no circumstances will the data be provided for advertisements or promotional purposes.

EveryAware Case Studies ensures the confidentiality of user data and does not provide un-anonymized data for third parties. Only research institutions may obtain anonymized data for research purposes and in order to reproduce research results.

When using the system, the EveryAware Case Study apps collect sensor data of smartphones (noise / air samples and geo coordination), and social communications taken via the app (Twitter and Facebook) and stores it on the Ubicon server.

Furthermore, EveryAware Case Studies stores user name, password, and other provided information (personal, information, contact data, social accounts information) on the Ubicon system. This data is being used for enhancing social contacts during the events; the data are kept confidential and are not provided to third parties.

These terms apply for data collection and usage by the EveryAware Case Studies application using the Ubicon system. Users have the right to request information about data concerning their person or user name without any charge.
